% of teens ages 12-17 who have had at least one major depressive episode in the past year, 2007-2017

Note: "Major depressive episode," as defined in the fifth edition of the Diagnostic and Statistical Manual of Mental Disorders, is used as proxy measure for depression. "Treatment" is defined as seeing or talking to a health or alternative service professional or using prescription medication for depression in the past year. Source: 2017 National Survey on Drug Use and Health, Substance Abuse and Mental Health Services Administration (Department of Health and Human Services).
